State Contract # 986739 Goldstrike Reclamation and Monitoring

Correspondence with BLM and DWR

Doug, I went out to the mine site early this morning. The rain gauge at Guzzler # 2 showed no rain since last month. The guzzlers were both

0006

about 2.5 inches from being full. I counted about 16 cows and two coyotes watching the cows.

The heap off-flow was about 3.5 GPM. The East Fork is dry. I assumed the area had rain last week but the storm must have gone around the mine area.

The back gate was closed. It didn't appear that the site has had much traffic lately; most likely because of the hot temperatures. It was 106 in St. George yesterday.

I went over to Butcher Knife and Slaughter Creek to see if there was any activity. Some one has pulled a travel trailer to the old drilling area that was drilled several years ago. There is no one there and no disturbances. The spring over there has a little water but is almost dry.

The cows are cleaning up the area around the land application area.

That's all for this month-

Dan Slyter
